tatami-mattress size (42.1)

Hypochlorous acid soda from Food additives, acidity regulator from Food additives and Zia AQUA from water. The combination of these materials turns into power to kill germs and deodorize and keep high stability and safe.

Secure and safe "Zia AQUA"

Hypochlorous acid soda (Sodium) is used to kill germs and deodorize in various fields. But you must be careful when you use it and always demerit (metallic corrosion, changing color of cloth and stimulation to the skin, etc) shows up. But Zia AQUA solves the problems and makes this demerit as small as possible.

This is always by your side. Zia AQUA

ODOR ELIMINATOR & BACTERICIDE

The food industry and the medical field need to keep clean.
Deodorant and eradication are also important at our home, of course.
"Zia AQUA" supports your safe, secure, and healthy life in various scenes.
This is safe for children and pets, because of its source of food additives.
